

The diagram illustrates a cross-section of a roof structure. It features a central triangular shape with a peak at the top. The roof is composed of several layers: an outermost blue line, a red line, a blue line, and a red line. Below these layers is a thick, curved blue layer. The entire structure is supported by a base consisting of a blue line, a red line, and a blue line. The word "Roof" is written in a large, bold, black font in the center of the diagram.

Roof

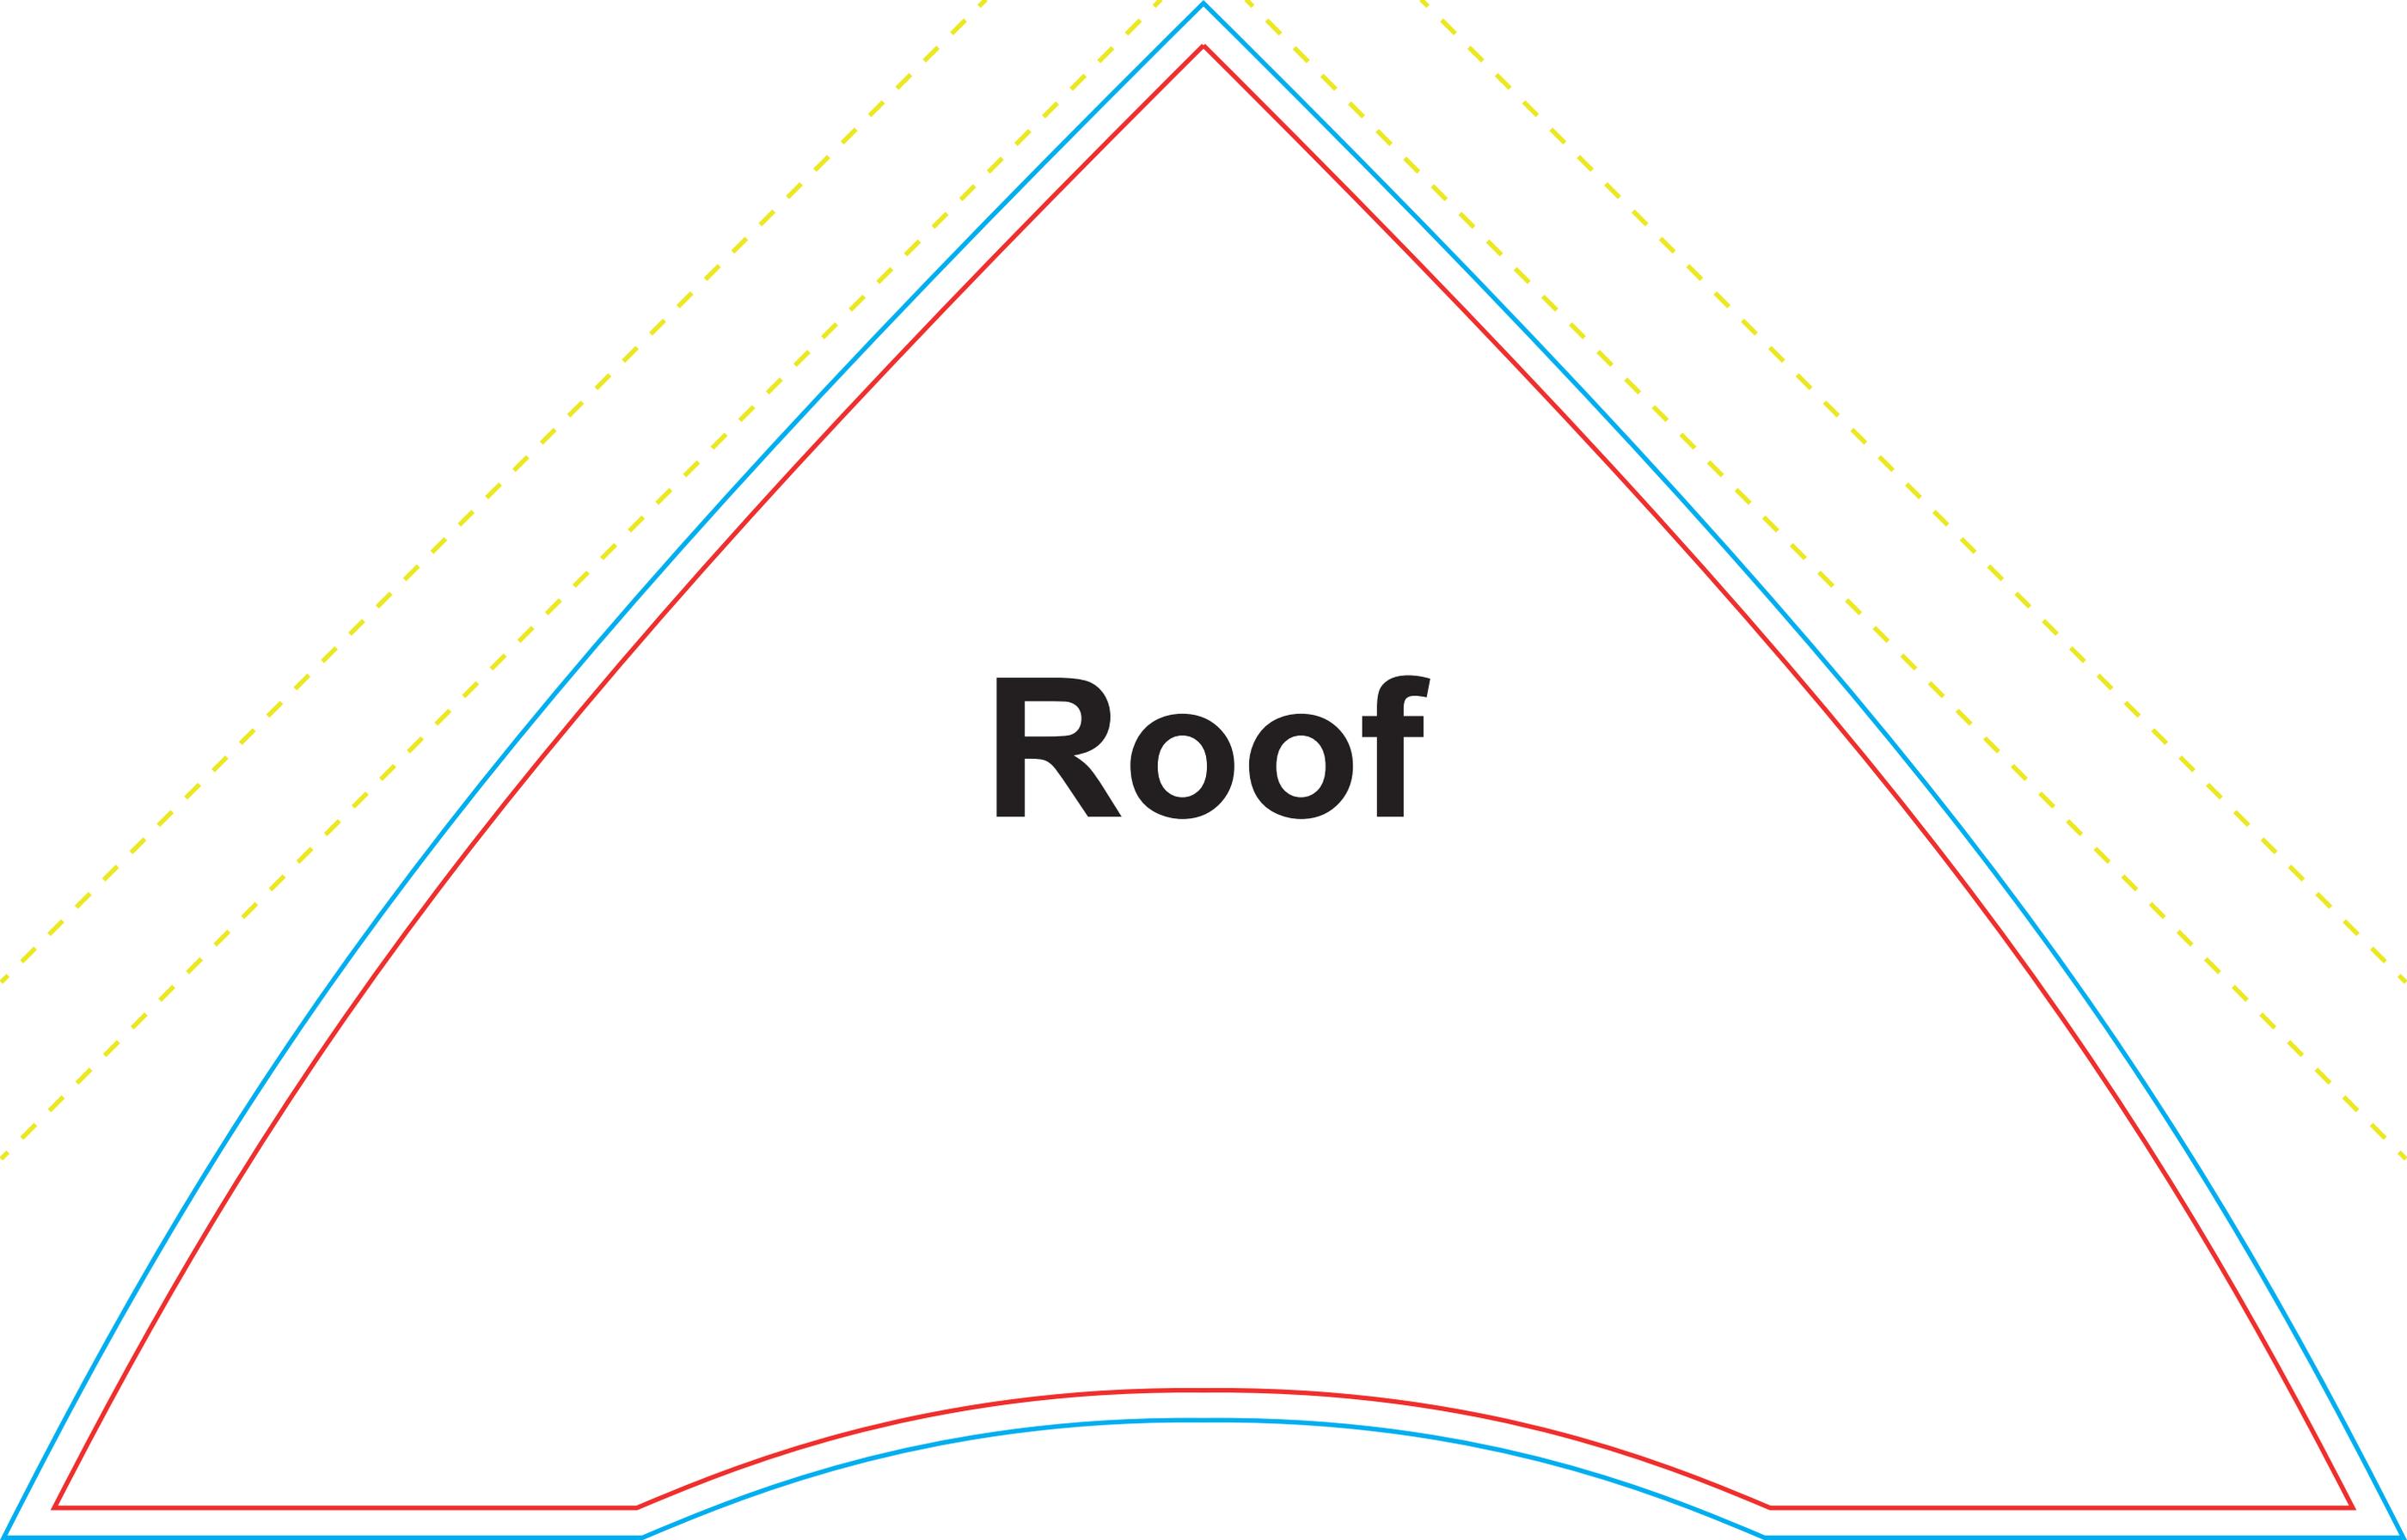

The diagram illustrates a cross-section of a roof structure. It features a central triangular shape defined by a red line, which is enclosed by a blue line. This entire structure is surrounded by two layers of dashed yellow lines, representing insulation or additional structural layers. At the bottom of the diagram, there are two curved lines, one red and one blue, which likely represent the roof's profile or a specific construction detail. The word "Roof" is written in a large, bold, black font in the center of the image.

The word "Roof" is written in a large, bold, black font in the center of the diagram.

Roof

The diagram illustrates a cross-section of a roof structure. It features a central peak with a dashed yellow line representing the outermost boundary. Inside this, there are two solid lines: a blue one and a red one, both following the same curved path. At the base of the roof, there are two horizontal lines, one red and one blue, which curve slightly upwards in the center. The word "Roof" is written in a large, bold, black font in the center of the diagram.
